Subject: OEH code change

forwarded from Lou Courtney:

As a resident of Old East Hill, I ask that you please vote NO to the Land Development Code zoning amendment proposed by Dr Laura Hall, East Hill Animal Hospital.

I ask that this business, located not only in a C-1 area and a historic preservation district but also adjacent to residential properties, be required to operate under the conditions it was originally allowed to open under which does not allow for outdoor areas for dogs. This type of business should be located in an industrial area of the city, C-3, where this type of use is permitted.

This proposed change is not for the good of the residents nor the existing businesses- it only stands to benefit EHAH. This change would decrease everyones property values and adversely affect our quality of life.
