FISHING TOURNAMENT MARINA PROJECT

- Grant Award - \$3,190,502
- Goal: Provide and Enhance Recreational Opportunities to construct infrastructure by:
 - Providing a public day use 48 slip fishing marina;
 - Providing a location to host public and charity fishing tournaments;
 - Providing public access in an area with little or no public marinas
 - Increasing opportunities for fishing, public boating, beach going, education
 - Install a regulation fish weighing station
 - Install environmentally friendly lighting
 - Performance Criteria: public use of constructed amenities to be monitored for 2 years.

KAYAK & CANOE LAUNCHES

EASY LAUNCH

The easy launch kayak dock system provides a recessed dock section for reduced deck height during loading. The grab bars steady the passenger while the boat cradle positions the kayak close for easy launch and retrieval. Add this kayak launch system to the end of a traditional boat ramp for a multi-purpose dock.

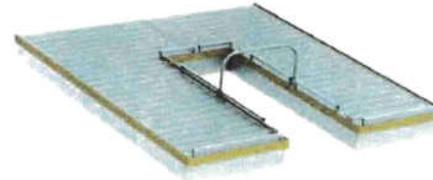

EXPRESS LAUNCH

The Express Launch Kayak dock system is a great option for high traffic areas. While one party launches their kayak or canoe at the recessed decking area, another party can begin the process of placing their boat in the rail system. The rail system of the Express Launch not only provides additional support for the kayaker during launch and retrieval but also the elevated undercarriage of the express launch keeps the boat raised at the loading platform.

VERSI LAUNCH

The Versi Launch system is great for kayaks and canoes as well as a multitude of other small watercraft. This dock system, has holding bays which keep the watercraft still during loading or storage. The Versi Launch can be enhanced with grab rail options, loading platforms, accessories, or ADA lift designs. If your project caters to multiple boat types as well as kayaks and canoes, the Versi Launch may be right for you.

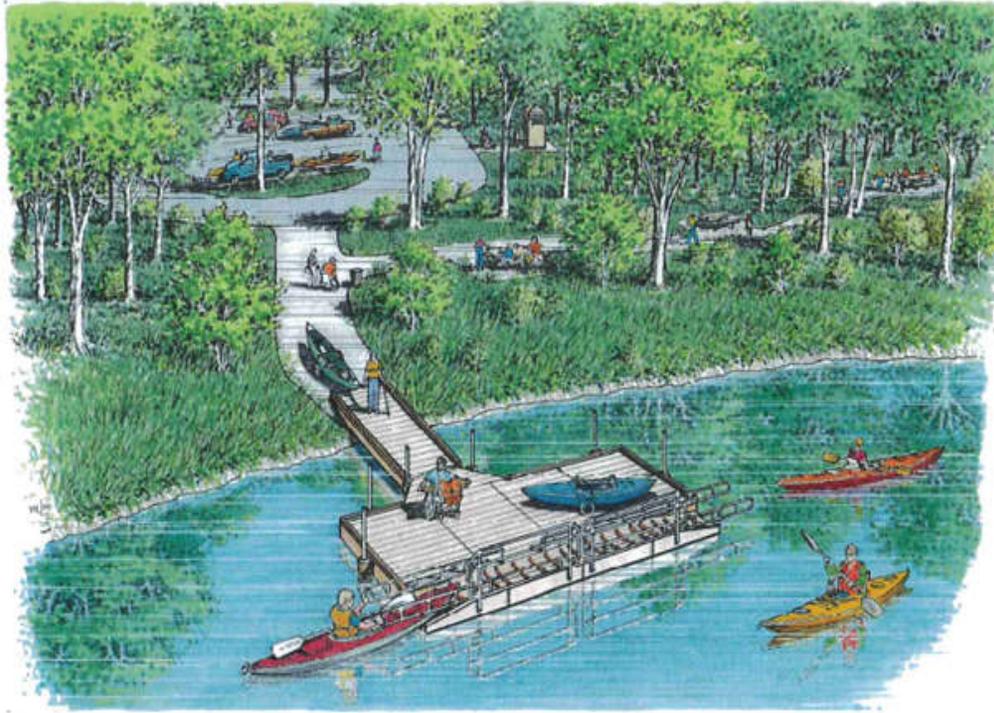

KAYAK FISHING TRAILHEAD PROJECT

- Grant Award - \$1,402,531
- Goal: Provide and Enhance Recreational Opportunities
- Convert Sanders Beach power craft launch to paddle craft, expand parking lot add informational signage
- Provide access at Baars Park for enhanced recreational kayaking and fishing
- Create 9.5-mile kayak fishing trail
- Performance Criteria: Public use of the constructed facilities for 2-year period

Best practices/ conceptual illustration from google search. Needs public input. Concept and design not final for Baars Park.

CONCEPT ONLY
