SUMMARY:

With the leadership and support of the Mayor and input from the City staff at the Mayor's direction, the City Council participated in the appointment of a Complete Streets Ad Hoc Committee and approved Resolution No. 29-12, establishing a policy of incorporating bicycle and pedestrian elements into all future road projects. Last year, the City staff identified a series of bicycle path projects and cost estimates for Council's review. In order to move forward with this policy implementation, it is necessary to appoint a new Ad Hoc Committee to work with City staff toward the completion of the Council's and Mayor's project.
