### SITE VALUATION

### Site Valuation Methodology

Sales Comparison Approach: A set of procedures in which a value indication is derived by comparing the property being appraised to similar properties that have been sold recently, then applying appropriate units of comparison and making adjustments to the sale prices of the comparables based on the elements of comparison. The sales comparison approach may be used to value improved properties, vacant land, or land being considered as though vacant; it is the most common and preferred method of land valuation when an adequate supply of comparable sales are available.

- Market Extraction: A method of estimating land value in which the depreciated cost of the improvements on the improved property is estimated and deducted from the total sale price to arrive at an estimated sale price for the land; most effective when the improvements contribute little to the total sale price of the property.
- Alternative Method: (Describe methodology and rationale)

Site Valuation Comments: Comparable one is the most recent single-family lot sales in the subject's neighborhood or adjoining neighborhoods. Comparables two and three are larger and in superior neighborhoods. The subject property, assuming it were vacant would compare most similar to comparable one and inferior to comparables two and three for location and size. Based upon a direct comparison of the subject to the three comparable lots, and assuming the subject was vacant land, it is my opinion that the value of the lot would be \$26,000.

Site Valuation Reconciliation: Based upon a comparison of the subject parcel (assuming it was vacant land) to the comparable, I would reconcile the subject's lot value at \$26,000.

variances in age, condition, improvement size and bathrooms as well as variances in other features such as car storage variances and other site improvements. After the adjustments, the three comparables reflect an adjusted range of \$71,000 to \$79,800. With about equal weight to each adjusted sale, I reconciled the subject's current market value at \$75,000.

**Indication of Value by Sales Comparison Approach** 

\$ 75,000

#### **Comments:**

#### Sales Comparison Approach:

I performed a search for recent comparable improved sales to compare to the subject property. My search revealed a total of 37 sales occurring in the last year ranging in price from \$33,500 to \$160,000 with an average price of \$85,411 and a median price of \$89,500. However, many of the homes were either in superior condition, located in a superior location as compared to the subject and/or much larger in size. Of the 37 sales located, the three selected for comparison purposes were considered to be the most comparable to the subject.

The subject is in average condition, which is inferior to the three sales. Based upon a comparison of the subject to the three comparable sales, I have applied a downward condition adjustment of \$5,000 to the three sales to compare to the subject's inferior condition.

The subject includes one bathroom. Sale one included two bathrooms with sales two and three having one and a half baths each. The adjustment for a half bath versus a full bath is approximately \$1,500 for homes in this price range. Therefore sale one is adjusted down \$3,000 and sales two and three are adjusted downward \$1,500.

The size of the subject is most similar to sale three. Using an depreciated cost new adjustment of \$15/SF for the difference in size, a downward size adjustment of \$1,600 is applied to sale one with a downward adjustment of \$2,200 applied to sale two.

Sale two includes drive-only car storage which is most subject with sale one having a one-car carport and sale three having a one-car garage. A downward adjustment of \$1,500 is applied to sale one for the and a downward adjustment of \$2,500 is applied to sale three for its superior car storage.

The subject includes a front and rear covered porch as well as chain link fencing and a detached storage building. In comparison with the features included in sales one, two and three, I apply a downward adjustment of \$1,500 each to sales one and two for superior amenities.

Once the above noted adjustments have been applied, the three comparable sales reflect a narrow range from \$71,000 to \$79,800. With about equal weight to each adjusted sale, I reconcile the subject's value via the sales comparison approach at \$75,000.

#### STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS

This appraisal is subject to the following assumptions and limiting conditions:

- This report is prepared using forms developed and copyrighted by the Appraisal Institute. However, the content, analyses, and opinions set forth in this report are the sole product of the appraiser. The Appraisal Institute is not liable for any of the content, analyses, or opinions set forth herein.
- No responsibility is assumed for matters legal in character or nature. No opinion is rendered as to title, which is assumed to be good and marketable. All existing liens, encumbrances, and assessments have been disregarded, unless otherwise noted, and the property is appraised as though free and clear, having responsible ownership and competent management.
- I have examined the property described herein exclusively for the purposes of identification and description of the real property. The objective of our data collection is to develop an opinion of the highest and best use of the subject property and make meaningful comparisons in the valuation of the property. The appraiser's observations and reporting of the subject improvements are for the appraisal process and valuation purposes only and should not be considered as a warranty of any component of the property. This appraisal assumes (unless otherwise specifically stated) that the subject is structurally sound and all components are in working condition.
- I will not be required to give testimony or appear in court because of having made an appraisal of the property in question, unless specific arrangements to do so have been made in advance, or as otherwise required by law.
- I have noted in this appraisal report any significant adverse conditions (such as needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) discovered during the data collection process in performing the appraisal. Unless otherwise stated in this appraisal report. I have no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and have assumed that there are no such conditions and make no guarantees or warranties, express or implied. I will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because I am not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable public and/or private sources that I believe to be true and correct.
- I will not disclose the contents of this appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and/or applicable federal, state or local laws.
- The Client is the party or parties who engage an appraiser (by employment contract) in a specific assignment. A party receiving a copy of this report from the client does not, as a consequence, become a party to the appraiser-client relationship. Any person who receives a copy of this appraisal report as a consequence of disclosure requirements that apply to an appraiser's client, does not become an intended user of this report unless the client specifically identified them at the time of the assignment. The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public through advertising, public relations, news, sales, or other media
- If this valuation conclusion is subject to satisfactory completion, repairs, or alterations, it is assumed that the improvements will be completed competently and without significant deviation.

#### VALUE DEFINITION

#### Market Value Definition (below)

Alternate Value Definition (attached)

MARKET VALUE is defined as the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. buyer and seller are typically motivated;
- 2. both parties are well informed or well advised and acting in what they consider their own best interests;
- 3. a reasonable time is allowed for exposure in the open market;
- 4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
