THIS EMAIL IS FROM AN EXTERNAL EMAIL ACCOUNT

Hi Greg,

I have passed along your email to the Reads. I'm a little confused as to the fit question as there is only one way a shutter can fit into a window frame. These shutters will be closed at all times as they are for darkness and hurricane protection. They will fit inside the outer frame of the window. I would love to have functioning shutters like I did in New Orleans but the windows have dropped their weights so can not open high enough to reach the latch on a shutter which has to be half way up. Hopefully, the Reads can answer their inquiries to their satisfaction because I would hate to have to resort to my husband's suggestion of tin foil.

Thanks for the info,

Lesla
