SUMMARY:

Pensacola International Airport is required by Title 49 Code of Federal Regulations Part 1542 to operate and maintain a security system for the airport campus. The Airport utilizes a software system called Lenel, with limited authorized Lenel support contractors in the area. Security Engineering, Inc. is an authorized Lenel support contractor who is able to meet the Airport's required emergency response timeline. Additionally, all Security Engineering Technicians currently have badged access to restricted areas as needed. Security Engineering, Inc. handles all needed repairs on a time and material basis.

As part of the expansion on the Northeast quadrant of the airport campus, portions of the fence fiber related to the security system needs to be relocated from the public side into the secured airfield side to maintain the integrity and security of the system. To maintain the security sensitive information of the Airport's Security Program, in addition to sustaining established testing and maintenance efforts, Airport Staff recommends the use of Security Engineering, Inc. for the project.
